Why Implants: Interdisciplinary Approach to Dental Implants

In Association with North County Oral & Facial Surgery Center

Friday, November 3, 2017

PROGRAM DESCRIPTION
The dental patient has been replaced by a dental consumer looking for proven, predictable solutions. Tooth loss and replacement pose both physical and emotional effects on patients. Early detection is key when treating any disease process. Understanding indications for treatment and effectively communicating benefits while managing expectations are critical in delivering predictable outcomes.

Collaboration among the entire dental team strengthens the knowledge of case selection, case presentation and ultimately case acceptance. This session identifies the true impact of the interdisciplinary relationship between the dental hygienist, dental assistant, administrative team, restorative dentist and specialist.

LEARNING OBJECTIVES
• Identify basics of implant types and components.
• Communicate benefits of implants versus crown and bridge
• Understand benefits of surface technology from placement to final restoration.
• Understand how mechanics of implant design impact crestal bone maintenance
• Increased case acceptance through effective communication

Speaker Shreeti Ruparelia, RDH, MBA
Date Friday, November 3, 2017
Time 8:30 AM – 9:00 AM
9:00 AM – 11:00 AM
